

Solutions for Perfection from Marin Industrietechnik

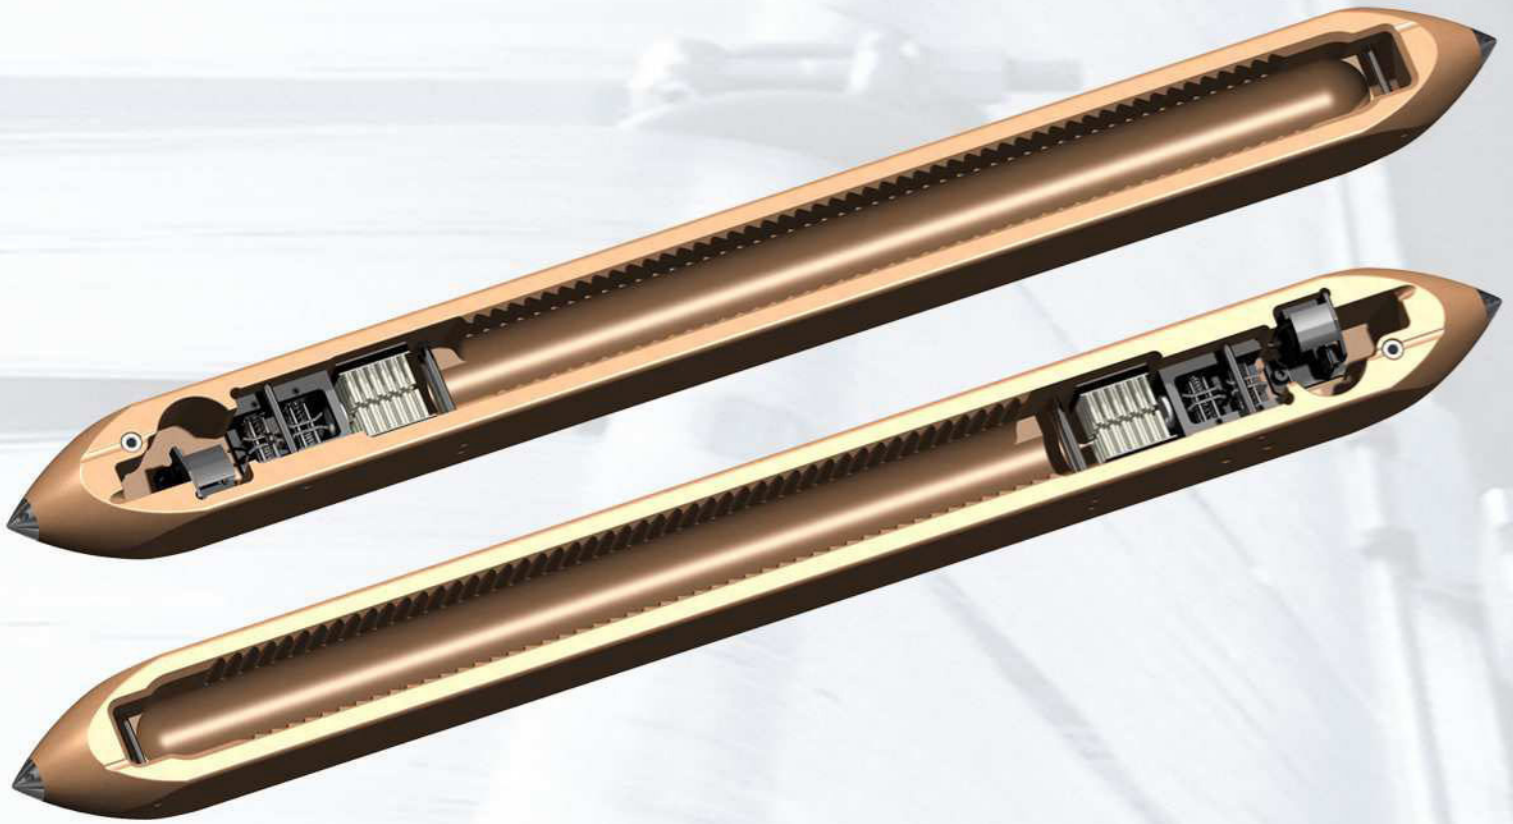

## Heavy Weight Weaving Shuttles MSK

- *10-15 % Higher productivity utilization*
- *Cost reduction due to long life materials*
- *Cost saving due to modular construction*
- *No weaving marks on the fabric*

## Weaving Shuttles Type MSK

High-Tec Shuttle type MSK with polished sliding skids and full equipment. Shuttle made out of fibre reinforced laminated material. Application: For use at weaving with non-rewind cops like it is eg usual at the corrugator belts production.

### Full equipment:

2 Steel tips, 2 Dowel pins for fixing the rubber strip, 1 Ceramic eyelet, 2 Brush strips (aluminum reinforced) with 35 bristle bundles, 1 Yarn cutter type A and 1 Filling brake type MS, 2 Dowel pins as filling guiders and all screwing connections.

### Shuttle dimensions:

800/768 x 66.5 x 56/52 mm

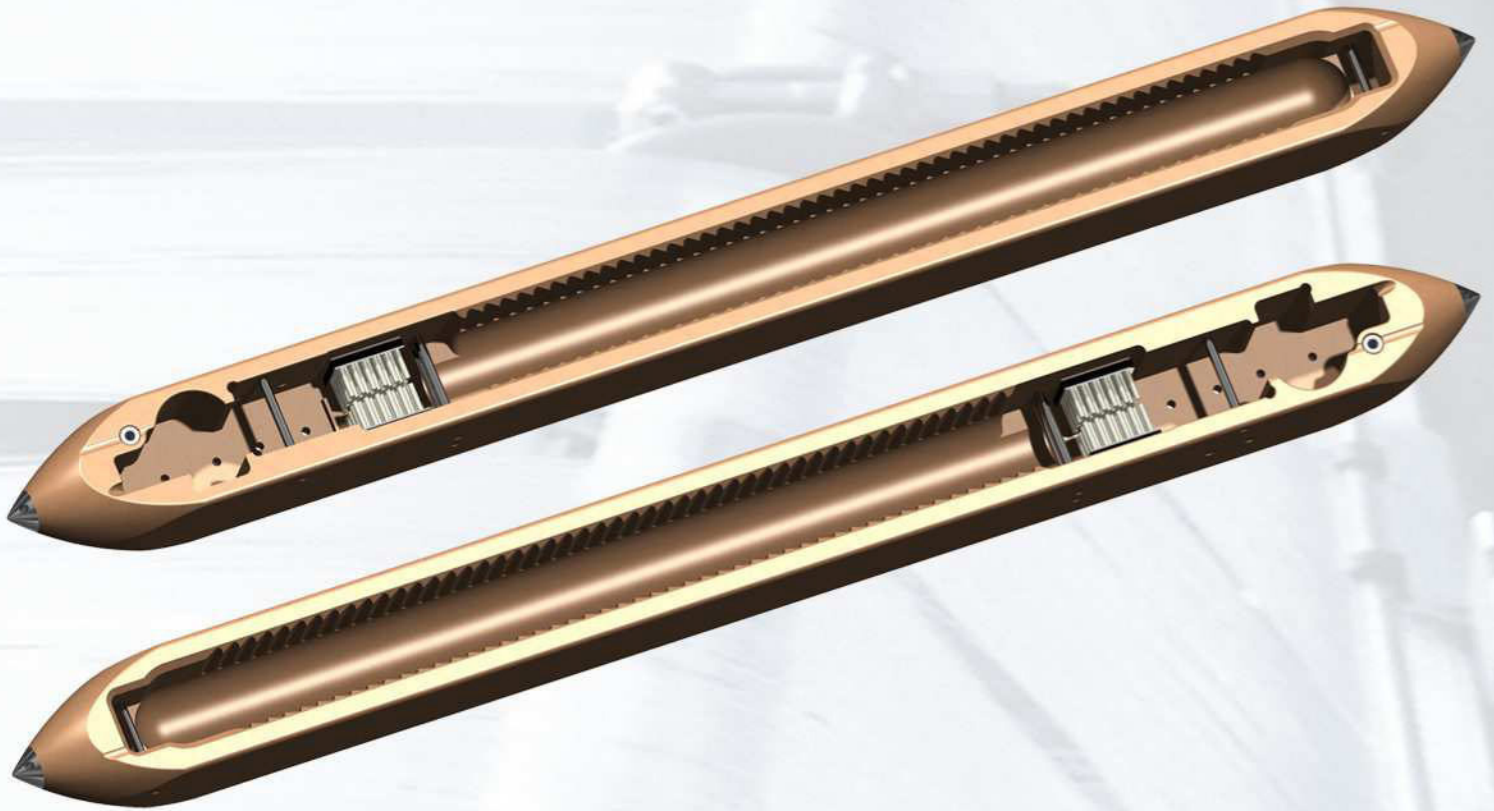

Brush strips: Changeable brush strips

35 bristle bundles

## Weaving Shuttles Type MSG

High-Tec Shuttle type MSG on the highest precision level with basic equipment.

### Basic equipment:

2 Steel tips, 2 Dowel pins for fixing the rubber strip, 1 Ceramic eyelet, 2 Brush strips (aluminum reinforced) with 35 bristle bundles and 2 Locking nuts

### Shuttle dimensions:

800/768 x 66.5 x 56/52 mm
