

Solutions for Perfection from Marin Industrietechnik

Heavy Weight Weaving Shuttles DRKL

- *10-15 % Higher productivity utilization*
- *Cost reduction due to long life materials*
- *Cost saving due to modular construction*
- *No weaving marks on the fabric*

Weaving Shuttles Type DRKL

High-Tec Shuttle type DRKL with polished sliding skids and full equipment. Application: At Weaving looms with hydraulic picking units and manual pirn changing. For pirns with a short end shape.

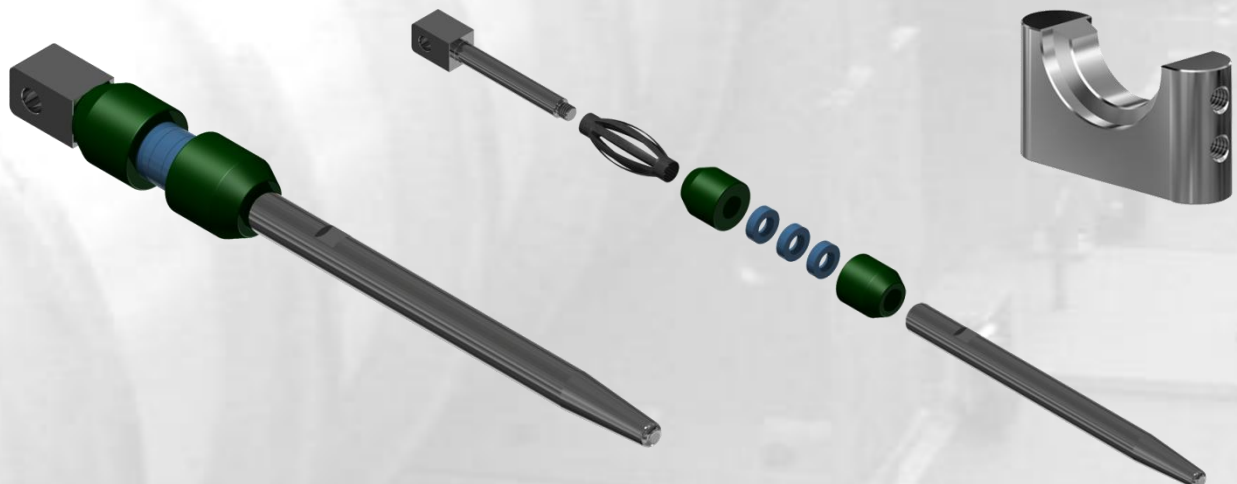

Full equipment:

2 Ceramic eyelets, 1 Shuttle nose type ARL, 1 Shuttle nose type ARR, 2 Sensor plates type A, 1 Pirn holder type D, 1 Yarn cutter type A, 1 Filling brake type BR, 1 Pirn spindle type A2 and all screwing connections.

Shuttle dimensions:

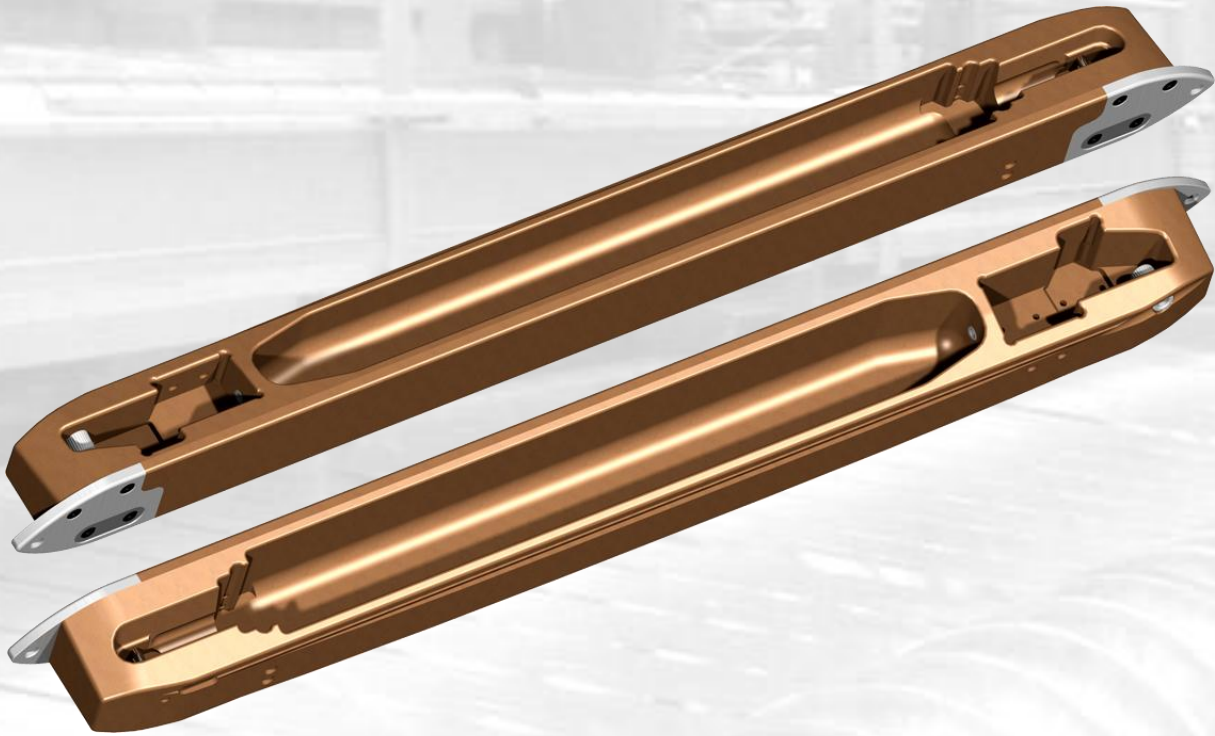

860/800 x 80 x 67/50 mm

Pirn spindle type A2 & Pirn holder type D: The pirn spindle is completely dismountable and all parts could be changed.

Weaving Shuttles Type DRGL

High-Tec Shuttle type DRGL on the highest precision level with basic equipment.

Basic equipment:

2 Ceramic eyelets, 1 Shuttle nose type ARL, 1 Shuttle nose type ARR, 2 Sensor plates type A, 2 locking nuts, 1 dowel pin for the pirn spindle and all necessary screws.

Shuttle dimensions:

860/800 x 80 x 67/50 mm
